Letter of Recommendation

Date: Dec. 31st 2015

To Whom It May Concern

China Railway 18th Bureau Group WLL has been engaged in the construction of the piling, substructure and superstructure works for one project in Doha, Qatar. Over the duration of the project a significant delay of the issuance of drawings and disruption to the piling works, has caused significant delays and additional costs to the project.

We engaged the services of Quantum Global Solutions (QGS) to review our situation and provide a strategy and recommendation for a way forward. I am delighted to say that QGS performed their duties to an exceptional standard and did exactly what they said they would do; in that they reviewed all contractual documentation and provided a clear and easy to understand solution to our significant delays and additional costs to the project.

Speaking on behalf of China Railway, we have found QGS to be an excellent company to work with, their staff are highly professional, approachable and their high level of expertise takes away the Contractors concerns and worries associated with delays and submitting claims.

We would have no hesitation in recommending QGS to any Contractor facing contractual and commercial issues.

Yours sincerely

China Railway 18th Bureau Group WLL
