

Letter of Recommendation

Letter of Recommendation

To Whom It May Concern

Project: New Doha International Airport (NDIA), Doha, Qatar

Crisplant designed, procured and installed the Baggage Handling System for the New Doha International Airport Main Terminal Building and Airport Operation Facility between 2006 and 2014.

In 2010 we initially engaged the services of Quantum to provide guidance and advice to our planning team related to scheduling and delay impact in order to help us deal with a very demanding and difficult client. Following the initial success of this engagement we engaged Quantum on a more involved basis to take direct control of the weekly update of the schedule and the possible impact from various issues imposed to the project, and to be part of the resolution as well as to resolve any issues that arose.

Quantum personnel quickly integrated into the project team and provided Crisplant with highly professional and specialist planning support which they were able to continue providing when it was necessary to prepare and submit extension of time requests.

Quantum were engaged on our NDIA projects for four years until their completion in 2014. As a result of their efforts the submitted Claims have been settled amicably and without recourse to the formal remedy of arbitration.

Speaking on behalf of Crisplant, I have found Quantum to be an excellent company to work with, their staff are highly professional, objective and industrious and the overall level of professional competency is unmatched by any Consultant we have used to date.

I would have absolutely no hesitation in recommending Quantum to any Client in need of expertise in project planning and delay analysis.

Yours sincerely,

Karl Birk Soerensen
