### TO WHOM IT MAY CONCERN

Project: **New Doha International Airport (NDIA)**  
**Contract Number 25045-000-FC1-CS01-00010**

Dear Sirs

The Sinohydro-Gamuda-WCT Joint Venture (SGWJV) has been engaged on the New Doha International Airport since July 2005 constructing runways, taxiways, aprons, drainage systems and two vehicular tunnels, for an original contract sum of QAR 1.8 billion.

In early 2007 we engaged the services of Quantum International to review and, where appropriate, prepare claims documents for submission to the Employer. Following the successful completion of this task Quantum were retained on a full time, continuous basis from mid July 2007 to the present date to lead the preparation, presentation and negotiation of all contractual and commercial issues.

This has recently been successfully concluded by agreement of a final contract sum of almost double the original contract value without any requirement for entering into any form of dispute resolution process.

Quantum has integrated well into the project team and assisted the various project teams in resolving many other issues.

I have no hesitation in recommending Quantum International to anyone considering using consultants to provide expertise in producing claims documentation, including delay analysis, etc. or for managing general day to day contractual and commercial issues.

Yours sincerely

Stuart Matthews  
Project Manager  
Sinohydro-Gamuda-WCT Joint Venture
