- Rail Infrastructure
- Civil Construction
- Marine
- MEP
- Commercial Buildings
- Industrial Plants

#### Summary

Regional Director Qatar and Technical Director, Andrew Woodward is responsible for management and delivery of multiple project portfolios and relationships with numerous clients' assignments throughout the region. Drawing on his extensive background within the construction industry in Europe and the Middle East, Andrew provides detailed and incisive analysis on areas of risk, forensic delay analysis and guidance on the formulation of claims strategies involving complex network logic matters, concurrent delay and the development of suitable claim strategies.

As a Chartered Civil Engineer (MICE), Andrew draws on experience ranging from large-scale highways infrastructure, earthworks, structures, marine, utilities, waste, recycling, process engineering and heavy engineering to complex building works, tower blocks and other building type infrastructure projects.

Andrew has first-hand experience with adjudication, arbitration and DAB processes, having been party to disputes, provided shadow expert advice to parties in dispute and acting as party appointed Expert Witness in arbitration. In addition, Andrew provides specialist advice, guidance and support in the formulation of Extension of Time (EoT), prolongation and disruption claims for our clients working on civil, infrastructure and building construction type projects including cross-examination at International Arbitration under ICC rules.

Some of Andrew's expert works include:

- Polysilicon Industrial Plant, Qatar. Party Appointed Expert Witness on matters of delay in Arbitration (Bespoke contract, ICC rules).
- 5,000 tonne cement plant, Qatar. Party Appointed Expert Witness on matters of quantum in Arbitration (FIDIC contract, ICC rules).
- Ghost expert services on matters of delay and disruption with MEP works, including analysis report for a seven-star hospital in Abu Dhabi.
- Pan European Transport Corridor infrastructure project, Romania, approximately US\$ 105 million road project.
- Pan European Transport Corridor infrastructure project, Romania, approximately US\$530 million rail infrastructure project.
- Respondent in Arbitration. Approximately US\$ 2.1 million dispute with a specialist contractor involving issues of design responsibility, quality of workmanship and resultant issues of delay, disruption and costs of abortive work with the construction of five highway structures in the Irish Republic.
