#### Summary

Matthew Schofield, Executive Director with particular expertise in forensic delay analysis services to Quantum clients and currently assists heading up the planning team. Matthew is a versatile and committed Consultant, with over 20 years' experience in project/operation management, planning, delay analysis and risk management. Matthew has extensive on-site construction experience on a broad range of construction projects within Australia, Asia, and the Middle East including the following clients:

- Larsen & Toubro – Qatar
- CCC – Qatar
- Saudi Bin Laden Group - KSA
- JTC – Qatar
- Leightons – Australia & Asia
- Laing O'Rourke – Australia
- Gammon - Hong Kong
- Dogus – Qatar

Matthew has led and been part of claim teams for the construction of multi-billion dollar projects and has completed numerous expert reports for arbitrations. He utilises various project controls and forensic analytical techniques, providing advice and support with regards to delays, disruption and implementing project controls. His main achievements include:

- Manage and lead the claims planning team for the construction of a US\$ 3 bn airport project in KSA.
- Delay analysis expert for a US\$ 500 mn oil and gas project in Qatar.
- Delay analysis for an independent party appointed expert to complete delay analysis in an arbitration.

The projects Matthew has worked on include:

- Kowloon express railway terminal, Hong Kong
- King Abdul Aziz International Airport, Jeddah, KSA
- Rayyan Road, Doha, Qatar
- Oil and gas onshore project, Ras Laffan, Qatar
- Lusail handball court, Qatar
- Barzan onshore project, Ras Laffan, Qatar
- Goonyella to Abbot Point rail expansion, Australia
- Metro MEP works, Doha, Qatar
- Umm Al Houl power plant, Al Wakra, Qatar
